

M1004 Series Digital Calibrator

M1004

Choose M1004 when you need a quick pressure check for clean, dry gas measurement.

Digital Calibrator

Meriam M1004 is a single function, portable pressure instrument with flexible features to meet many of your everyday pressure measurement needs. The device features an easy and intuitive user interface with convenient pressure connections.

- A wide range of pressure sensors are available for a variety of applications
- Common features include damping to stabilize fluctuating pressure signals
- Luer Lock Fittings included
- Accessories: fitting kit, vacuum & pressure hand pumps, carrying case
- Device ships with calibration certificate traceable to NIST

 Certification

Features on M1004

- Compact and easy to use
- Multiple pressure ranges
- Zero key and user adjustments for manual calibration
- Compound, Absolute, and Differential pressure sensors
- Protective blue boot
- Optional pressure fitting and hand pump kit

Applications

- Very low differential pressure measurement for ventilator instrument testing
- Sterilizer vacuum measurements
- Non-invasive blood pressure instruments
- Facilities testing (medical gases)
- Leak testing for low pressure gas systems
- Pressure drop monitoring across filters
- Monitoring vacuum on condensers and pumps
- CPAP and BIPAP testing

Specifications

Accuracy

- 0.025 % full scale
- 100 psi maximum pressure

Media

- Clean, dry, non-corrosive, gas media

Pressure ranges

- 0 to 15, 30, 100 psi Absolute non-Isolated
- -1 to 1, -5 to 5, -14.5 to 15, 30, 50, 100 psi Differential Non-Isolated
- -1 to 1, -5 to 5, -14.5 to 15, 30, 50, 100 psi Compound Non-Isolated

Measurement Units

- Offering over 30 measurement units including psi, mmHg, inH₂O, mbar, and user defined units

Display Resolution

- 6 digits

Temperature Specifications

- Storage: -40 °C to 60 °C (-40 °F to 140 °F)
- Operating: -20 °C to 50 °C (14 °F to 122 °F)

Connections

- 1/8" Female NPT 316SS (Luer Locks Fittings included)

Power

- 4 AA batteries
